# Eco-tourism not Logging

- Eurobodalla Shire is an important visitor destination on the south coast of NSW, welcoming 1.2 million visitors per year. 1,425 jobs are directly supported by tourism - 850 jobs are indirectly supported.
- Mogo was a hot finalist in the 2021 NSW tourism awards.
- Mogo could be a flagship destination for forest based recreational activities if we stopped native forest logging here. As part of its economic recovery already \$3.75m has been pledged to turn Mogo into a nationally significant mountain bike trails centre. This network includes unlogged compartment 146. We mustn't allow any more logging of the natural asset used to attract mountain bike riders from around the country.

## Next forest on the chopping block:

Compartment 146, east of Mogo, lies south east of Dogtrap Road and even straddles the Tomaga River at one point. It is so close to the Mogo Zoo you can hear gibbons, lions and lyrebirds as you walk around.

It is the only remaining unlogged forest in the area (satellite photo at right). **Despite the fires, and in defiance of the EPA post-bushfire conditions**, Forestry Corporation NSW is going to log it unless we speak out!
